Appendix 1: Schedule of Strategic Policies

Schedule of strategic policies

The policies within the Local Plan comprise both strategic and non-strategic elements. Strategic policies are those that set out the overarching spatial strategy and address the key priorities of the area, including any relevant cross-boundary matters. Non-strategic policies provide more detailed guidance on localised issues and support the implementation of the strategic framework.

This schedule identifies which policies in the Local Plan are considered strategic and non-strategic, having regard to national planning policy and guidance, and provides clarity on the status of policies within the Local Plan.
